

Driver Safety Body Worn Police Camera

RDBC-Mini

Police Body Worn Camera technology to the Fleet Driver Risk Management markets, in an effort to reduce risks associated with fleet drivers that are not managed well with in-Vehicle Surveillance Solutions alone. For the first time what a driver sees and how they interact with a passenger or customer in or outside the vehicle can be documented for use as video evidence to reduce risk, validate claims, dismiss wrongful claims made against your company drivers.

Protect your Fleet Drivers with Driver Body Worn Cameras that can help protect them from personal risk that can damage a driver's reputation, cause loss of work, loss of license or criminal charges.

Protect your Company with Driver Body Worn Cameras that can help protect from liability lawsuits and wrongful claims made that can damage School District or company reputation and jeopardize assets from those who will bear false witness and deceive in order to get a fat settlement.

Features:

- High Quality High Technology Ambarella Processor Chip
- Super High Definition Resolution Images 2560 x1080 or 1920 x 1080
- 2 inch TFT-LCD High-Resolution Color Display
- Mini in size and lightweight
- Time stamp display/ Car number stamp display
- IR LEDs for Night Vision Recording
- 170 Degree Viewing Angle, Large Field of View to Capture it all
- Dash Recorder Mode; works as a dashboard camera (Car Mount Option)
- Rugged Weatherized IP68 Driver Body Camera solution

Applications Where Driver Safety Body Cameras Can Help:

Pre Drive Safety Check - Often a vehicle safety check is required by company policy or mandated before school bus or commercial vehicle is driven. This safety check can now be documented with the Driver Safety Body Worn Camera in case claims are made that the vehicle was not safe to operate on the road, missing lights, no strobe, no Stop Arm, under inflated tires or other safety violation.

Wheel Chair Lift Operation - While interior cameras inside a school bus or paratransit vehicle may document the inside view of the lift operation, some situations or incidents may occur where it would be helpful to capture the operation from the outside on a Driver Body Camera. While rare, occurrences of those being lifted removing the safety straps themselves that secure their chair to the lift have caused falls directly resulting them their own actions that targeting driver lift failure ended up in large settlements in order to avoid court jury litigation.

Special Needs Passengers - Often they will require straps to secure them into their seats for transport, and some strap applications require a driver to push or pull straps between their legs and under crotch areas. Those of diminished mental facilities or under pharmaceutical medication may miss-interrupt perceived privacy violations, sexual abuse during this operation. The Driver Body Worn Camera can provide much more detailed video evidence from the drivers point off view that cameras in the vehicle cannot provide.

Special Needs Passenger To Door - Are often assisted by the driver to their door which outside the vehicle is no longer documented by the School Bus or Transit vehicle surveillance system. Claims made regarding to door service cannot be substantiated or refuted when the driver leaves the vehicle as the vehicle mounted surveillance system focus on in vehicle events.

On Site Service Applications - Service Companies like pest control, lawn care, pool service all involve quick stops and checks or service on many locations a day and often the customer may not notice the service person has stopped by. In some cases a simple note will be left to let them know your lawn was treated, or your site was provided a pest control application. Often the customer will claim the driver did not provide the service requiring a return trip to provide the customer piece of mind that the company is reputable and the driver did the right service. The Driver Body Camera can provide video surveillance and documentation of on site service process outside the customer site with images video both time stamped for verification if needed.

Security Officers - Similar functions of Police Body Camera performing motor and foot patrols can better document out of vehicle activities, interactions with others while documenting the process and details that might be overlooked at the time and later become essential in resolving liability litigation claims of wrongful action or activities.

The above application examples are just a sample of how cameras worn by drivers or officers can provide expert witness documentation of claims made that are often without third party witness and often difficult to resolve what really happened.

Regardless of the specific application when drivers perform their duties in the proper manor the Driver Body Camera can support their actions and provide verifiable video evidence that can confirm or refute allegations made against them.

Specification Model # RDBC-Mini

Video input	Police Body Worn Camera resolution 2560*1080
Display	2.0 inch 16:9 TFT LCD 960x240
Lens	170 Extremely Wide Angle Field OF View
Focus range	0.3~∞
CMOS	1/2" Color CMOS sensor
Body Size	78mm × 54.8mm × 31.1mm (length × width × height)
Photo	JPG file format, up to 21 million pixel camera Video Format: H.264 compressed format
Video Camera	2560×1080@30fps, 2304×1296@30fps, 1920×1080@30fps, 1280×720@60fps, 1280×720@30fps
Video format	MP4
Remote Control	One key operation professional wireless remote control
Exposure Mode	Auto Exposure
IR night vision	Built-in 8 high-power infrared light, night photography and video support, can identify faces up to 10meters
Audio frequency	Built-in microphone / speaker
Pickup	64KHZ
Memory	Body memory 64GB TF memory card
Shutter Speed	Electronic Shutter/1/2-1/2000s
Filter switch	Switchable lens filter, suitable for daytime, night use
White balance	Automatic
USB Interface	Mini USB Interface / USB 2.0
Lithium battery	High-capacity lithium battery, 3.7V 3000mAh
Operating Range	Temperature Range -30~65 Celsius /<90% Humidity
Operating Voltage	3.7V
Operating current	Power of about 320~340mA, video is about 420mA, screensaver about 350mA, 580mA IR on
Weather Rated	IP68
Certification	CE

Lawful Compliance Is The Responsibility of The Customer & Product User

ABV Inc., staff and administration are not responsible for any purchase or use of our merchandise, which is in violation of any applicable law, regulation or ordinance. ABV Inc., staff and administration are not responsible to you or any third party for any direct, indirect, special, incidental or consequential damages, arising out of use, misuse or inability to use any of our products. It is your responsibility to ascertain consent requirements applicable for video and audio recording and to comply with all applicable local, state, and federal laws applicable to the purchase or use of our video and audio surveillance recording products in your jurisdiction.

This device has the ability to permanently disable the Audio recording feature in a Administration mode, as well as temporarily disable the Audio recording feature via button. Should you have questions or concerns regarding the use of video and audio recording surveillance equipment, you are advised to contact an attorney licensed to practice law within your jurisdiction if you are unsure of the applicability of any law to the product you are purchasing or its intended use within your jurisdiction. By placing an order, you represent that you are of legal age to purchase the product being purchased in your jurisdiction, that you will use the product only in a lawful manner, and accept sole responsibility and liability should you use the product in a manner that violates the law.
