

### **Application Program Compatibility for SD4mX & SD4mXC**

The dedicated Video Player for this DVR is named "AVPlayer" and is a 32bit application for use on Windows XP, OS7 & OS8. Some 64bit versions of Windows operating systems will not support proper operations due to "WOW64" programming limitations related to; 32-bit device drivers and application extensions that rely on code injection. When available a 64bit version will be added to the free downloads site.

### **Minimum System Hardware Requirements for SD4mX & SD4mXC**

CPU: Intel quad-core Xeon or higher

Frequency: 2.33GHz or higher

RAM: 4G or higher
