**“SD4-3G”
 100% Solid State DVR**

The “SD4-3G” series of MVS Mobile Digital Recorders

The MVS-SD4-3G mobile vehicle DVR has no moving parts, twin 64Gb SD card bays and a robust Central Management Software (CMS) system for Wi-Fi 802.11 and 3G cellular networks, making it our Best Value vehicle video camera system choice, able to endure very harsh environments with full connectivity features making them well suited for high risk vehicle applications like school bus, law enforcement, EMS, transit, taxi, service or delivery vehicles.

Leading Features of the SD4-3G CMS / CP Network Include:

- **Built in Wi-Fi Module & Antenna**
- **Built in 3-Axis Accelerometer**
- **Built in 3G 3G/4G Connectivity Module**
- **Control Panel Driver Communication**
- **Built in GPS & Antenna**
- **Twin 64Gb SDHC, 128Gb capacity**
- **100% Solid State Digital Memory**
- **Wireless Data Download to PC Network**
- **Crash & Emergency Event Live Alerts**
- **Live View from vehicle camera to your PC**
- **Live Intercom with Driver**
- **Live Vehicle Location GPS Mapping**
- **60-400 Hours video file storage**
- **Reliable heat/cold/shock memory**

When it comes to tough, durable and long lasting data storage it is hard to beat the 100% Solid State digital storage of the SDHC based "Extreme Series" mobile video camera surveillance systems, uniquely suited for mobile vehicle surveillance. SD4-3G Solid State SD based DVRs can offer a vehicle digital video recorder memory storage device that is expected to outlive the vehicle.
