XDriven New User Memo

March 1, 2009

New purchasers of XDriven,

This is just a memo to those of you, who may be new to the XDriven product, informing you of a few items that can easily become a problem for those who are not aware of them or fail to completely read and fully understand the "Installation and Operation Manual".

Player Software

The player software is preloaded on the SD card the first time it is installed into the XDriven.

Should you for whatever reason need to get a copy of the player program software FMI has taken steps to insure you are able to access this valuable by placing this software on our FTP site for easy download to your PC.

Simply go to:

www.AmericanBusVideo.com

www.SchoolBusCamera.com

www.DigitalBusCamera.com

On the main page of each of our sites, you will find a link for "Customer Resources". Follow that link to the "FTP Site". The "XDriven" folder will be where this information is stored. Click on the file name and it will download to your PC.

Proper Power Down Required

This system makes use of your vehicles ignition on condition to create or complete a file-recording segment. Due to this is extremely important that the system be properly powered on and off as in those moments after power is applied and power is removed, it is creating or completing a file segment.

Make Sure Power is Off When Inserting SD Card

Unit power must be off prior to inserting or removing SD card of complete loss of data and possible damage to XDriven & SD card is possible.

Please Read & Understand The “Installation and Operation Manual”

Before using this product, read the manual to insure proper function of the product and prevent any damage to the product or loss of video due to misuse or failure to follow the manufacturers specific instructions.
